Buckle Up, Women. Cars Still Aren't Built for You.

March 24, 2026

NBC NEWS POLITICS U.S. NEWS WORLD LOCAL SPORTS CULTURE SCIENCE SHOPPING TIPLINE WATCH SUBSCRIBE

CONGRESS

Cars aren't tested properly for women's safety. Congress is trying to fix that.

Republican Sen. Deb Fischer's "She DRIVES Act" would raise the standards for car safety testing, promoting the use of "crash test dummies that reflect a woman's lighter frame."

Eight ways the world is not designed for women

What is SEAT IQ?

A mobile app that uses your smartphone's cameras and sensors with AI and computer vision to optimize your driving position.

Scan & Analyze

Uses smartphone cameras and sensors to analyze body composition and seating position.

Calculate Position

Bioinformatics-informed algorithm determines your **ideal seating for safety, comfort, and accessibility**.

Guide & Optimize

Receive real-time guidance to reach your recommended optimal seating position.

Learn & Improve

Continuously enhances recommendations through ongoing data analysis and safety modeling.

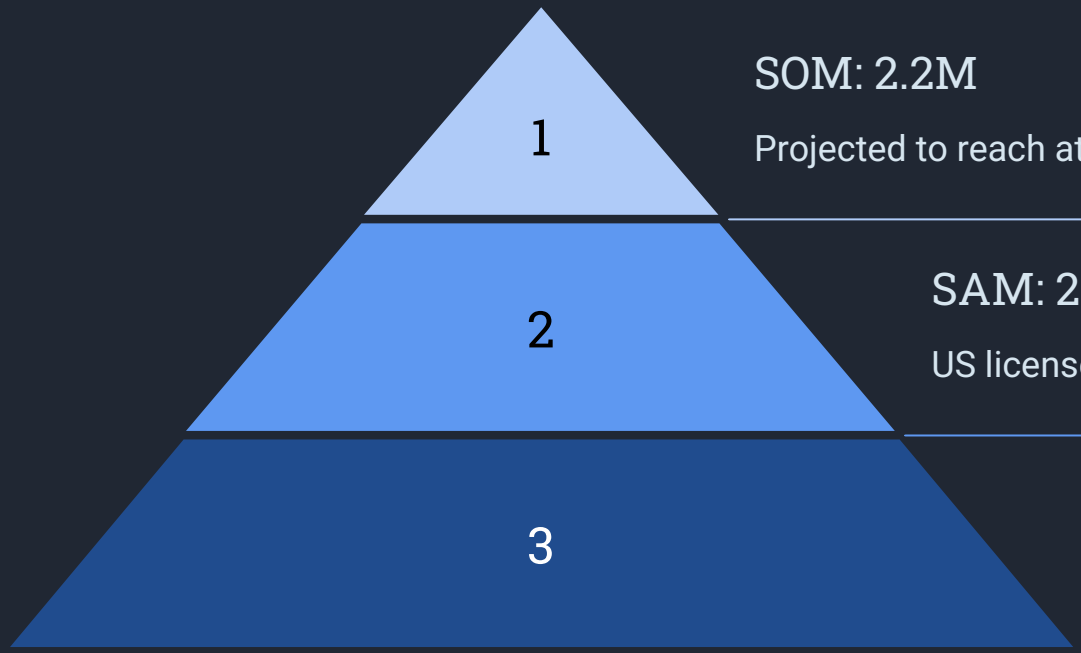

Made with GAMMA

39% Reduction in Composite Injury Severity Scores in Industry-Standard Software

Made with GAMMA

The Market

> ***SEAT IQ is completely unique to the market.***

SOM: 2.2M

Projected to reach at year 6

SAM: 234M

US licensed drivers age 18-49 with high smartphone usage

TAM: 1.6-2B

Total licensed drivers worldwide

Made with GAMMA

Our Target Customers

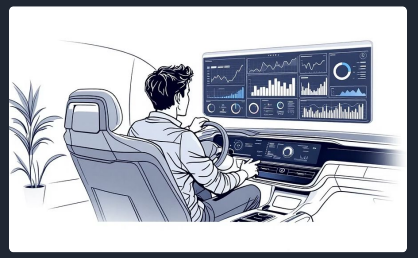

Safety-Focused Driver

Primary driver managing family tasks

Underserved Driver

Requires solutions for physical accessibility challenges

The New Driver

Inexperienced or younger, bias-aware drivers

Made with GAMMA

Direct to Consumer Sales

1 year subscription term | Basic: $24.99/yr | Pro: $34.99/yr

Expansion Path

Create stable income

B2B Licensing & Revenue Sharing • Data Licensing • Advertising & Affiliate Marketing

Insurance, Driving Schools, Dealerships, Corporate Fleets

Distribution Partners

Build trust and user base

App Store • Advocacy Groups • Social Influencers • Reputable Agencies • Word of Mouth

Made with GAMMA

Projected Growth & Revenue Milestones

Month 2

Begin user acquisition with 10 initial users.

Month 5

Launch driving school programs.

Month 10

Launch affiliate marketing programs

Month 17

Reach 5,000 total subscribers through direct B2C sales + early partnerships.

Month 26

Reach 20,000 users through mature B2B pipeline + organic growth.

Month 40

Launch insurance partnerships at 60-80K.

Begin with data licensing.

Month 68

Reach SOM with 2.2M users.

Made with GAMMA

Core Requirements

1

Functionality & Value

- Computer Vision
- Biomechanical Algorithm
- Real-Time Guidance
- Recalibration
- User Interface

2

Go-to-Market & Compliance

- Biometric Security and Privacy
- IAP Compliance

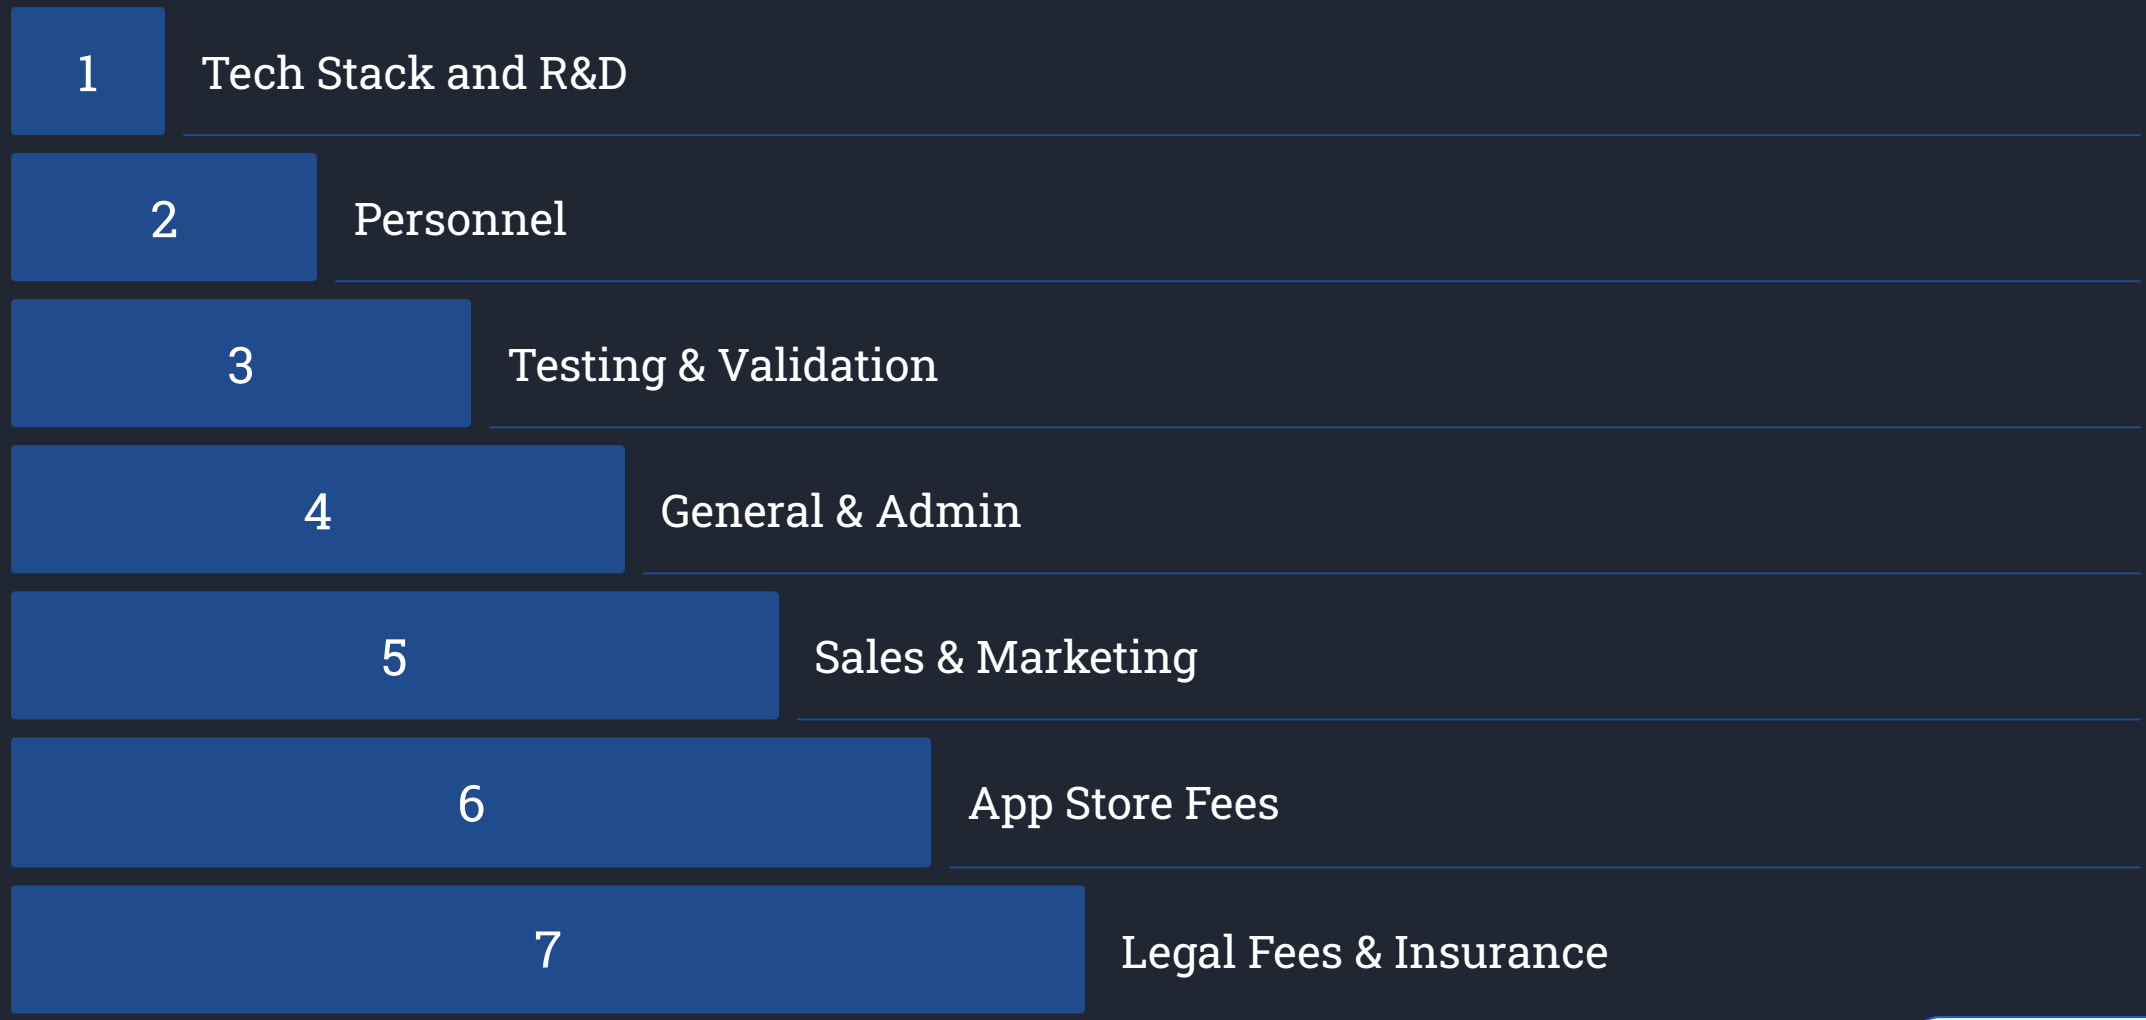

3

Distribution & Revenue Streams

- Subscription Features
- Analytics
- Enterprise SSO
- Affiliate Tracking
- Data Storage

Made with GAMMA

Cap Table & Ownership by Funding Rounds

Equity Holders	Ownership (Pre-funding)	Round 1	Seed Round
Founders (CEO, CTO, CFO)	80%	70%	60%
Option Pool	15%	15%	15%
Advisors	5%	5%	5%
Friends and Family	0%	10%	10%
Seed Investors	0%	0%	10%
Total:	100%	100%	100%

Equity Conditions:

- 4 year vesting period
- 1 year cliff
- Option pool reserved for future hiring
- Advisor equity typically 0.5%-1%

Fundraising:

- Conversations with friend and family
- Crowdfunding to create beta test pool as well
- Backed by incubator or NSF grant for scientific rigor
- Search for city economic development fund ex. McKinney, TX

Made with GAMMA

Core Costs

1

Tech Stack

- Begin with outsourcing then move in-house
- Begin at build
- Core functionality and revenue stream requirements
- Scales with user and revenue

2

Personnel

- 2 developers, QA, UI/UX designer at build
- C-suite take on various roles until expansion merits hiring
- Expand as company scales with sales, marketing, account managers, HR, accountant

3

Testing & Validation

- Built with standards and risk mitigation in mind.
- Includes an annual security audit, NHTSA stamps and other oversight agency approvals, plus maintenance fees.
- Peaks in early years then decreases, flat with regular audits

4

App Store Fees

- Folded into per-sale revenue and grows with user volume
- These costs are bypassed with B2B sales

5

General & Admin

- Starts with fully remote work and a small stipend for office use
- Covers SaaS tools like Zoom and Microsoft Office, bookkeeping needs, HR needs
- Legal fees and liability insurance
- Talent acquisition
- Grows with hiring and larger accounts

6

Sales & Marketing

- Includes paid acquisition, event costs, and tools.
- Expands drastically as the business moves to B2B and scales with company growth.

Made with GAMMA

Initial Valuation

Berkus valuation estimate

$900K

Out of max $2.5M pre-revenue ceiling

Sound idea	$275K
Prototype	$350K
Team	$125K
Relationships	$100K
Traction	$50K

Berkus values de-risking, not projections. Each dollar represents risk removed, not revenue expected. Typical angel pre-seed range: $1M–$2M for strong teams with prototypes.

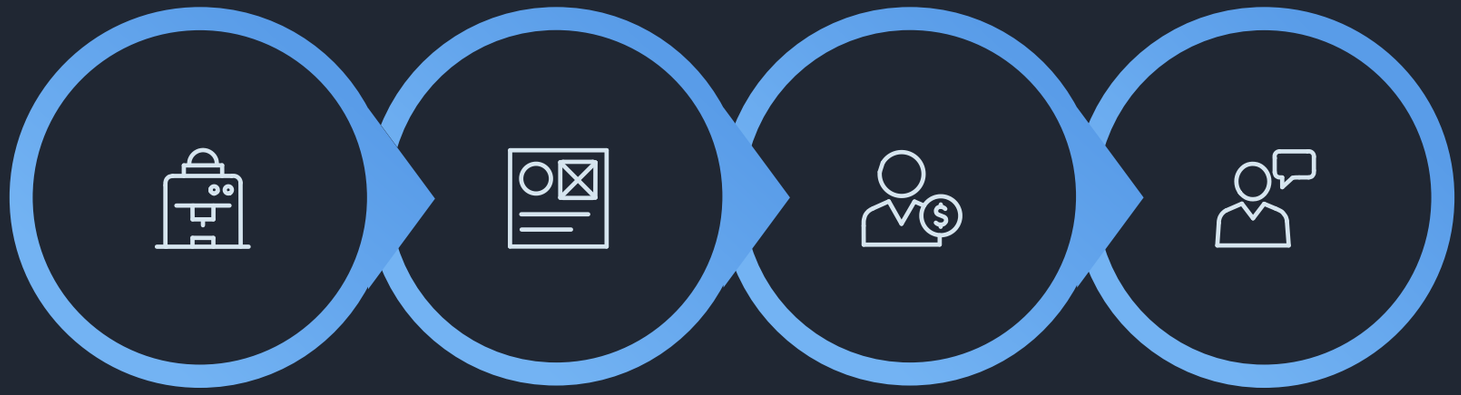

Scorecard valuation estimate

$1.21M

Composite multiplier: 0.97× on $1.25M baseline

Management team (30%)	0.65× → +$0.24M
Market size (25%)	1.15× → +$0.36M
Product/tech (15%)	1.30× → +$0.24M
Competition (10%)	1.35× → +$0.17M
Channels (10%)	0.70× → +$0.09M
Capital efficiency (5%)	0.65× → +$0.04M
Other (5%)	1.10× → +$0.07M

Scorecard adjusts a regional baseline up or down. The more you deviate from a 1.0× on each factor, the stronger or weaker your position relative to comparable startups.

Technology & Progress

(Proof of Concept, prototype algorithm, app wireframe)

IP

(Hard to replicate, possibility of moat)

Team

(Founder understanding, MBSE advisor)

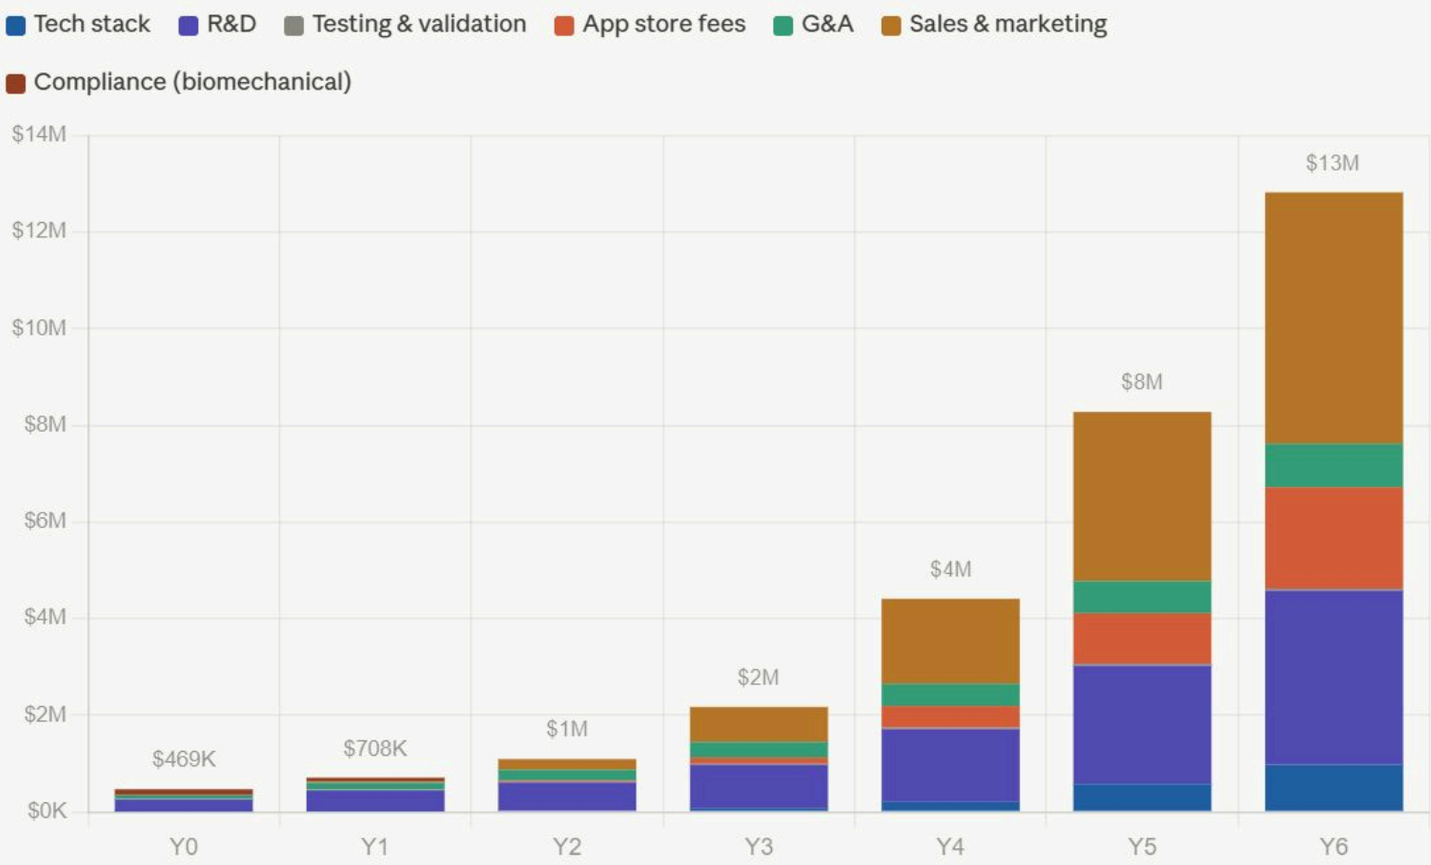

Market

(No competitor, new to market, large opportunity, attention)

Made with GAMMA

1 — Cost composition, Y0–Y6

All cost categories stacked. R&D and sales & marketing dominate at scale; tech stack accelerates from Y3 due to revenue-linked platform fees.

Y0–Y1: R&D is 53–69% of spend. Everything else is near-zero.

Y2: S&M jumps 760% — first B2B sales rep + paid acquisition launch.

Y3: App store fees hit $128K — 15% of $850K B2C revenue, unavoidable.

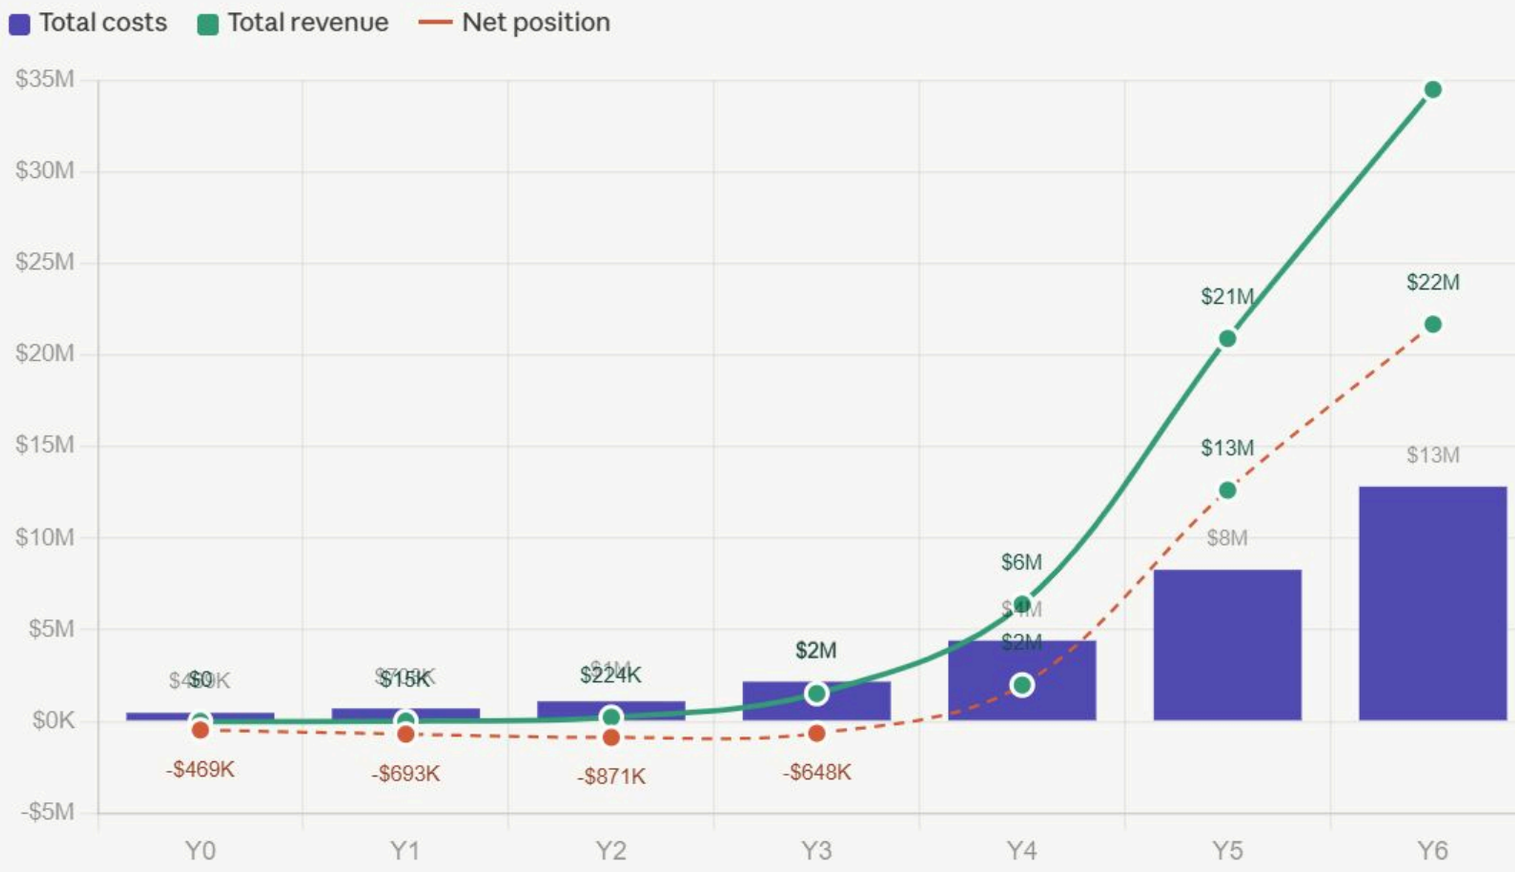

Y4+: RevenueCat + Stripe within tech stack become material ($278K by Y5).

Compliance: Biomechanical lab study $80–250K spans Y1–Y2. One-time but essential for insurance deals.

Made with GAMMA

2 — Costs vs revenue, Y0–Y6

Total costs (bars) against total revenue (line). Break-even in Y4. Year 6 surplus exceeds $20M.

Y0–Y3: Cumulative deficit ~$2.1M — covered by pre-seed ($850K), seed ($1.75M), Series A ($6.5M).

Y4: First profitable year. Revenue $6.3M vs costs $4.4M = **+$1.9M surplus.**

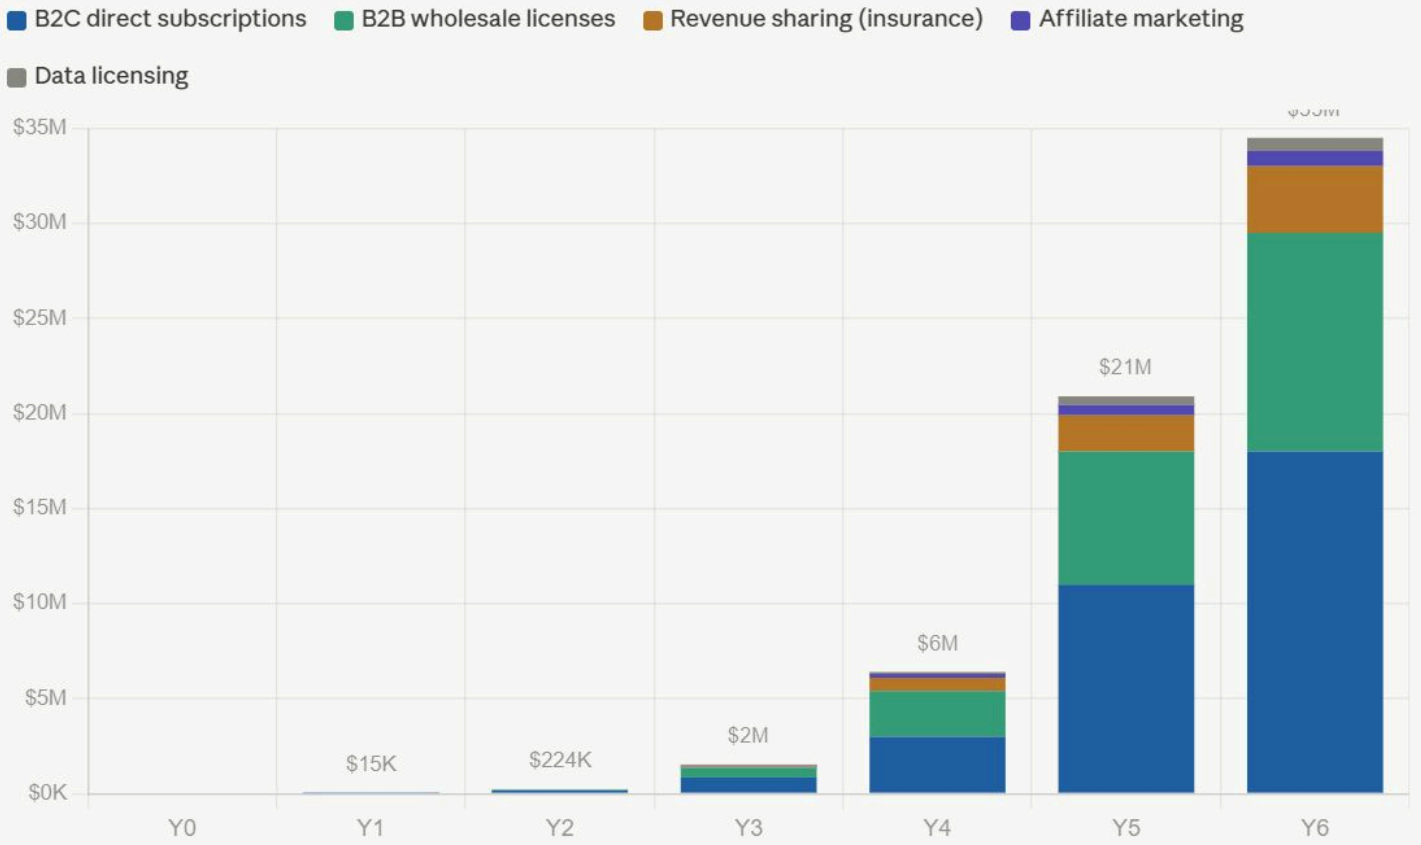

Y5–Y6: Operating leverage — revenue grows 3.3× Y4→Y5 while costs grow 1.9×.

Y6: Revenue ~$34M, costs ~$13.2M = **+$20.8M net.** Series B funds this scale.

Made with GAMMA

3 — Revenue composition, Y0–Y6

Four revenue streams stacked. B2C dominates early; B2B wholesale and insurance revenue sharing overtake it by Y5–Y6.

Y1–Y2: 100% B2C. Driving schools add seats from M6 but small in absolute terms.

Y3: B2B wholesale reaches 35% of revenue — dealer pipeline maturing.

Y4 M40: First insurance deal closes — +20K seats overnight, revenue jumps $480K in one quarter.

Y5–Y6: Insurance revenue sharing overtakes B2C as largest single channel by seat count.

Affiliate (M10): Small but zero-CAC. $550K by Y5 — insurance referral CPAs at $30–75 each.

Data licensing (Y3): OEM + municipal buyers. Never sold to insurers — protects the partnership channel.

Made with GAMMA

COMPLIANCE LANDSCAPE

Government & Regulatory Bodies

Organization	Role	Estimated Cost	When Needed
FTC	Consumer protection, data privacy enforcement	Legal review: ~$5K–$15K	Pre-launch
FDA	Ensure app is NOT classified as medical device	Legal classification: ~$5K–$10K	Pre-launch
NHTSA	Vehicle safety guidance, potential certification alignment	Testing/validation: ~$10K–$30K	Year 2–3
State Laws (CA, TX, IL)	Biometric data compliance (e.g., BIPA in Illinois)	Legal + audits: ~$10K–$25K	Pre-launch

Made with GAMMA

Industry Standards & Certifications

Standard	Purpose	Cost	When Needed
ISO 26262	Functional safety in vehicles	$15K–$50K	Year 2–4
ISO 11226	Ergonomic posture standards	$5K–$15K	Product validation
ISO 9241	Human-system interaction	$5K–$20K	UX validation
SAE International	Automotive engineering standards	$5K–$15K	Scaling phase
SOC 2	Data security for B2B trust	$20K–$60K	Year 2–3

Made with GAMMA

Platform & Legal Compliance

Requirement	Purpose	Cost	When Needed
App Store Policies (Apple/Google)	App approval & privacy compliance	Dev fees + rev share	Launch
ADA Compliance	Accessibility for all users	$5K–$15K	Pre-launch
HIPAA (if applicable)	Health data protection (only if medical claims)	$10K–$50K	Conditional
COPPA	Child data protection (<13 users)	$5K–$10K	If targeting minors

Made with GAMMA

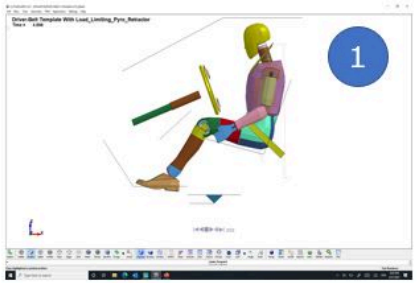

Saftey, Advocacy & Accessibility

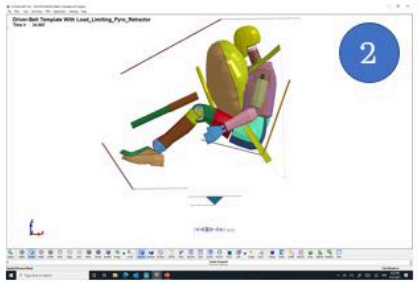

Organization	Role	Cost	When Needed
IIHS	Vehicle safety research alignment	Partnership-based	Year 2+
Safe Roads Alliance	Road safety advocacy	Low / partnership	Year 1+
CarFit Program	Driver ergonomics & positioning	Low / collaboration	Early validation
NAWHSL	Women-focused safety leadership	Partnership	Growth phase
Women Drive Too / HERide	Underserved driver advocacy	Partnership	Early adoption
Safe Riders Program (TX)	Driver safety education	Low	Regional pilots
Women in the Driver's Seat	Inclusive design insights	Partnership	Early design

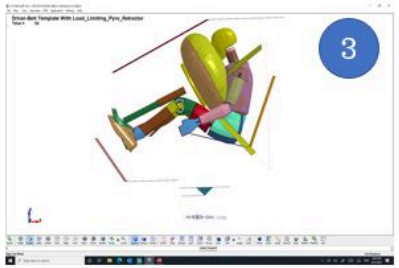

- Estimated Compliance Investment: ~$50K – $150K (Early–Mid Stage)
- Critical for user trust, safety validation, and B2B partnerships.

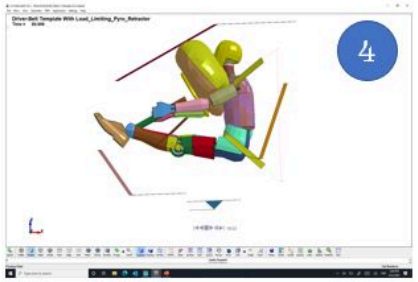

Made with GAMMA

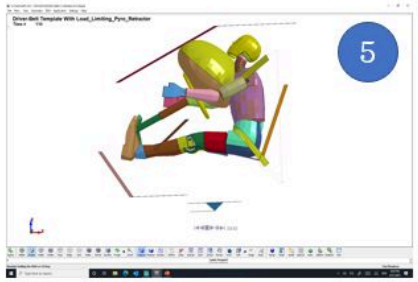

Simulation Sample

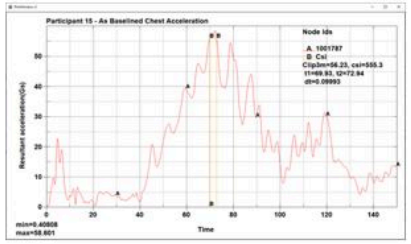

This photo series displays a sample of one crash simulation being run, and the graph in the bottom right corner shows LS-DYNA's graphical output of the simulation, specifically for chest acceleration, which is then analyzed and key information is extrapolated.

The simulation screenshots and graphical output are from separate simulations of different participants.

Made with GAMMA

Input & Output Model

Input	Output
Development team (developers, quality assurance, user interface/user experience)	Functional SeatIQ mobile application
Technology & software (app development tools, cloud services)	Real-time seating guidance & safety feedback
Data (user positioning data, driving behavior insights)	User data insights for optimization
Funding (grants, early investment)	Subscription revenue (Basic & Pro users)
Partnerships (insurance companies, dealerships)	B2B licensing revenue

Made with GAMMA

Operational Assumptions

Timeline & Marketing

- Media hype
- Advocacy and influencer traction
- **B2C growth shows demand for B2B growth**
- Insurance companies are latest launch due to proof of demand
- Beta test users develop word of mouth
- Development timeline

Oversight

- **Meet compliance**
- Federal laws
- Biofidelity
- Data
- Can run beta tests with minimal compliance

Technology

- Google MediaPipe
- Speed of recommendation & update
- Continuous improvement
- **Proof of concept & existing tools**
- Pain/comfort, accessibility, safety
- Integration
- **Data available**
- Physical limitation
- 2 devs, QA, and UI/UX —> MVP

Customers (B2C)

- Expansion
- Comfortable with data collection
- Drive regularly
- Experience pain point
- Will pay
- Will change behavior

Customers (B2B)

- Company operations
- Independent operations
- Volume
- Enough diversity through channels
- By SOM, 35% B2C, 25% Wholesale, 40% Revenue Sharing

Costs & Pricing

- Appealing and stable
- Revenue > cost for all streams
- Data can be sold
- 20% wholesale discount w/ upfront purchase
- Revenue sharing split 95/5
- 1 yr subscription mandatory
- 80% basic, 20% Pro
- 10% churn yr 1 - 2, 6% after
- B2B sales bypass app store
- Outsource tech —> move in-house
- Staged hiring with C-suite in hands-on roles

Made with GAMMA
